

Wagner Pereira Chequeleiro

Software Architect | Java 21+ & Spring Boot | Cloud (OCI) & DevOps | Systems Modernization & AI

Imbituba, Santa Catarina, Brazil | +55 48 99128-9765 | w.chequeleiro@gmail.com | LinkedIn: linkedin.com/in/wagnerpch | GitHub: github.com/wagnerpch | Lattes: lattes.cnpq.br/3588176452900510

Summary

Software Architect | Specialist in Java, Cloud, and DevOps ecosystems. I design and develop robust software architectures with solid experience in high-complexity systems for the Brazilian public sector, including projects and platforms linked to SUS and the State Department of Health. My primary focus is building modern, secure, and highly scalable microservices ecosystems. I work with an end-to-end software engineering vision: from backend conception and database administration to infrastructure and continuous delivery (DevOps). My architectural style favors well-justified decisions (documented via ADRs) rather than rigid prescriptions, with a special focus on modernizing legacy code to current standards.

Stack & Specialties

- **Backend & Architecture:** Java 21+, Spring ecosystem (Boot, WebFlux, Security), Virtual Threads, Microservices.
- **Cloud & DevOps:** OCI (Oracle Cloud Infrastructure), Docker, GitLab CI/CD, API Gateway.
- **Security & Data:** Authentication/Authorization with Keycloak, modeling and persistence in PostgreSQL.
- **Observability:** OpenTelemetry, Prometheus, Grafana.
- **Innovation & Automation:** Orchestration of AI agents (Claude Code + OpenHands via ACP) for agile refactoring, testing, and PR reviews.

Recent Highlights

- Implementation of a complete observability stack for reactive applications, ensuring precise real-time monitoring.
- Leadership in the architecture of migrating heavy web scraping routines (from Python to modern Java) using Virtual Threads and @Scheduled.

- Complex troubleshooting in cloud integrations and notification services. Always eager to connect business needs with cutting-edge technology.

Professional Experience

Supera Inovação em Tecnologia

Java Technical Lead | January 2023 - Present (3 years 10 months) | Goiânia, GO, Brazil

Technically lead the team responsible for the State Department of Health's microservices, driving architectural decisions, development standards, and technical alignment with clients and infrastructure:

- Technical decision governance
- Standardization and modernization
- Client and infrastructure liaison
- Architectural direction
- Team development

Stack: Spring Boot, Spring Security, Keycloak, PostgreSQL, Docker, GitLab CI/CD, OCI, OpenTelemetry, Grafana.

WCHC Consultoria em Tecnologia da Informação

Data Analysis | February 2022 - January 2023 (1 year) | Curitiba, Paraná, Brazil

Copel Geração e Transmissão S.A.

Administrative Assistant | December 2007 - February 2022 (14 years 3 months) | Curitiba, Paraná, Brazil

Planning, analysis, and control of training programs and respective budget. Development of Training Needs Assessment (TNA) in HR.

Companhia de Saneamento do Paraná - Sanepar

Administrative Assistant | February 2006 - November 2007 (1 year 10 months) | Curitiba, Paraná, Brazil

Academic Background

Cruzeiro do Sul Virtual

Systems Analysis and Development, Information Technology | November 2023 - December 2026

Cruzeiro do Sul Virtual

Lato Sensu Postgraduate - Specialization, Software Engineering | September 2021 - October 2022

Escola da Associação dos Magistrados do Trabalho do Paraná

Specialization, Labor Law, Labor Procedure, and Social Security Law | 2015 - 2016

UNICURITIBA

Bachelor of Laws (LL.B.), Law | 2010 - 2014

Core Competencies & Awards

- **Competencies:** Java Development, Development Team Leadership, Platform Architecture.
- **Award / Honor:** Best Memorial in Defense of Victims in Portuguese.
